Bart van Nobelen

MSc Electrical Power Engineering | TU Delft | Energietalenten Scholarship

Rotterdam, Zuid-Holland, Nederland

Ervaring

Energietalenten

Ambassador of the energy transition

september 2020 - Present (2 jaar 1 maand)

The Energietalenten scholarship program is a joint endeavour of the Topsector Energie and other companies in the energy sector. During this two year program, I actively take part in the transition towards renewable energy as an energy transition ambassador, along with other participating master students.

Hence, I am involved in the following activities:

- As a board member, I discuss with stakeholders about the performance & future of the scholarship program
- As part of the acquisition team, I try to grow the number of partner companies
- Inspiring the younger generation by giving lectures at secondary schools about the energy transition
- Following offered workshops to further develop my personal skills
- Actively contribute to set-up a network of energy professionals

Skischule Serfaus

Ski instructor

december 2021 - april 2022 (5 maanden)

Serfaus, Tirol, Oostenrijk

UniPartners Delft

Junior consultant

mei 2020 - juli 2020 (3 maanden)

Delft

At UniPartners I have developed a tool for farmers to map their energy consumption. The tool gives farmers the necessary insight to make a well-considered investment in sustainable energy generation by showing which combination of solar and wind energy provides the best concurrency of energy generation and consumption. The users can also play around with the model themselves to see what coverage they can achieve per day with a certain number of solar panels and/or wind turbines, accurate down to the half-hour.

Berenschot

Intern

september 2019 - januari 2020 (5 maanden)

Utrecht

In the 5 months working as an intern at Berenschot I learned what it's like to be a consultant in the fields of both Operational Excellence and Energytransition. During my internship I worked along on projects for clients of Berenschot and I've been busy developing an Operational Excellence Maturity Scan for companies in the Field Service sector. This tool speeds up and standardizes the process of assessing the strong and weak points of the operational process of a company.

KlasseStudent

Substitute Teacher

2018 - 2019 (1 jaar)

Den Haag

Substitute teacher at Lyceum Ypenburg in The Hague for short or long term absent teachers.

Opleiding
